

INDOOR AIR QUALITY

Did you know that the average human breathes in about 3,000 gallons of air each day? Particles in the air can cause numerous health problems. Let us help you control the quality of air inside your home. While the McNeece Service Company technician is working on your system, check out some of the products we offer. If you have any questions, just ask your technician. We can have you breathing cleaner air in no time.

SPECIALTY AIR FILTERS

RETURN GRILLE FILTER - A high-efficiency, long-life alternative to one-inch filters. It captures a significant amount of the airborne particles in the air that circulate through the filter. The pre-assembled filter easily inserts into and out of existing return grille.

MEDIA AIR CLEANER - A whole-house media air cleaner is up to 85% more efficient at capturing both microscopic particles like dust and smoke in addition to larger contaminants such as mold spores and pet dander. This highly effective air cleaner also requires minimal maintenance. Basically, once you install the filter you only need to replace it every 6-12 months.

AIR PURIFIERS

UV STICK LIGHT

- Kills mold, mildew and bacteria on AC coils
- Economical
- Reduces AC maintenance
- Helps AC run more energy efficient and can increase life of your central AC unit
- Low operating cost
- Helps reduce musty, moldy smells from AC
- Control Odor

IN-DUCT AIR PURIFIER

- Dual ionizers to reduce airborne particulates (dust, dander, pollen, mold spores)
 - Kills up to 99% of bacteria, mold and viruses
 - Reduces sneeze germs by 99% in the time a sneeze can reach three feet.
 - New zinc ions kill 99% of viruses on surfaces
 - Unlike portable units that are limited to the room in which they are placed, this provides whole home and building purification.
 - Easily integrated with your existing HVAC system.
- The unit doesn't take away living space and operates silently.

WHOLE-HOME STEAM HUMIDIFIERS

If you live in a dry climate, or frequently find that the air in your home is uncomfortable due to dryness, a whole house humidifier can help make the air in your home much more breathable.

Problems caused by dry indoor air include:

- Itchy skin
- Dry and cracked lips
- Irritated throat
- Nose Bleeds
- Damage to wood floors and furniture

Whole-home humidifiers help minimize your risk of illness, as viruses and bacteria do not thrive in moist air. Since humidifiers add moisture to the nasal passages and respiratory systems, they could also help minimize snoring. From general comfort to allergy issues, a whole house humidifier can make a world of difference.

BENEFITS OF GOOD INDOOR AIR QUALITY

BETTER BREATHING

MOISTURE CONTROL

FEWER ALLERGENS

LOWER ENERGY COSTS

BETTER SLEEP

SAVE 20%

with our INDOOR AIR QUALITY PACKAGE

This package includes:

- * A whole-home steam humidifier

Having good air quality in your home is important for many reasons, but above all, clean air keeps you healthy and safe. McNeece Service Company values the health and safety of our customers.

ACT NOW & BREATHE EASIER!

MAINTENANCE

Preventative maintenance can save energy, avoid unnecessary repairs, and extend the life of your HVAC system. Be sure to ask your technician about signing up for a Platinum Maintenance Agreement. Not only do agreement participants receive two tune-ups per year, they also receive a 10% discount on most repairs.

Do you often forget to change your air filter? Do you get home from shopping to find you forget to buy filters? How many times have you been at the store and couldn't even remember what size of filter to buy? We can help! Any maintenance agreement customer can sign up for our filter program and get a year's supply of filters delivered to your home during a scheduled maintenance visit.

OTHER PRODUCTS WE OFFER

WI-FI THERMOSTATS

Program, monitor, and manage your thermostat from your smartphone, tablet, or computer. Stay comfortable with our 7-day programmable Wi-Fi thermostat.

SURGE PROTECTORS

A surge protector prevents electrical spikes (from lightning strikes, electrical shortages, or power outages) from damaging valuable electronics and appliances in your home. Most people know that their TV, their computers, or most of their electronics should have surge protectors and many people make sure that they are protected... but how many people protect one of the largest and most expensive electronic appliances in their home — their heating and cooling system?

Your comfort is our calling.
